

# Do you think Epstein really killed himself?

Here are the facts.

## The Guards & the Cell

Both guards **fell asleep** and **falsified logs** the night he died.

Epstein was **removed from suicide watch** just days after a prior attempt.

His **cellmate was removed**, leaving him alone — against protocol.

Two **security cameras “malfunctioned”** or had corrupted footage at the time of death

## The Autopsy

Independent experts: **neck injuries were more consistent with homicide.**

## The Client List That Disappeared

Ghislaine Maxwell was **convicted of trafficking children to no one.**

How can you have 1000 victims and no perpetrators?

**No high-profile names** ever investigated or charged — despite flight logs and witness statements

## Missing Pieces

- **Flight logs are incomplete** and redacted.
- **Surveillance footage vanished.**
- **Court documents still sealed**

Do you really think Epstein killed himself?

This is how stupid they think you are. DON'T PROVE THEM RIGHT
